_____

EDUCATION

Universitas Hasanuddin 2013 - 2018 *Bachelor's Degree of Social Sciences, Majoring to International Relations*
Current GPA: 3.77 / 4.00
Universitas Multimedia Nusantara 2022-present *Master's Degree of Management Technology*
Purwadhika Digital Technology School 2019 *Job Connector Web and Mobile Development*
Purwadhika Digital Technology School 2022 *NFT Blockchain Development*

EXPERIENCES

PT. Sribu Digital Kreatif (*Sribulancer/ Sribu*)

Frontend Developer - 2019

- Make code reusable.
- Ensure technical feasibility of UI/UX design.
- Building reusable and modular React components that can be easily integrated into different parts of the application.

Smart Province Sulawesi Selatan

UI/UX Designer - 2020
- Creating low-fidelity sketches or wireframes to outline the basic layout and structure of the user interface.
- Developing the visual aesthetics of the interface, including selecting colors, typography, icons, and images.
- Working closely with cross-functional teams, including developers, product managers, and other stakeholders, to ensure the design vision is effectively implemented.

Kompas Gramedia Media

Frontend Engineer - 2020-present

- Implementing user interface designs and ensuring that the user experience is smooth and intuitive.
- Connecting the frontend to various backend services and APIs to fetch and update data.
- Integrating the application with CI/CD pipelines to automate the build, testing, and deployment processes.
- Apply web design principles and responsible for ensuring that website runs well on several devices.

SELECTED PROJECTS

- **ETHSend** – Project that can sending ethereum through the blockchain network. start with create a stunning design website using reactJs and tailwindcss, connected to the blockchain, metamask pairing, interaction with smart contracts using solidity.

- ***voteDAO*** – Create a smart contract, where holders of a specific NFT token, grants access to a DAO. These NFT holders may create proposals that other members of the DAO may then vote on. If there is a majority consensus on a proposal after the voting period has ended the DAO can then move forth on acting on said proposal. This project using ReactJs for frontend, and write smart contract using Solidity.

- **GenMedia** – This project combining the power of Next.js and Tailwind CSS to craft a visually stunning and user-friendly interface, while seamlessly integrating real-time news data through APIs to keep our users informed and engaged with the latest headlines from around the world.

SKILLS

Html, Css, Javascripts, ReactJs, React Native, NextJS, Express, Tailwindcss, Figma, Solidity, Critical Thinking, Active Learning, Organizational Skills, Problem Solving, Innovative Thinking.
